MAGNETIC MOUNTING DISPLAY SYSTEM

AWARD WINNING GRAPHICS

LEACH COLOUR
PROFESSIONAL DIGITAL IMAGING

DISPLAYING BRILLIANCE

Developed by Leach Colour to meet the demand for a no-nonsense display system that is simple to install and update, always looks good and is inexpensive to distribute and maintain.

The Stik system consists of 2 elements - a permanent magnetic base graphic that is installed by our fitters and a flexible PVC graphic panel with a special ferrous coating and which can be installed by anyone.

Fixing or replacing graphics involves no tools, nails, screws or adhesives, simply remove the old panels and position the new ones.

For more information visit our dedicated website: www.interiorgraphicsolutions.com

KEY FEATURES

- High quality graphics printed directly onto PVC material
- Permanent magnetic base installed by Leach
- Does not crease, wrinkle or tear
- Replacement magnetic fascia graphics fitted in seconds by store staff - no tools required
- Easy and inexpensive to distribute
- Offers minimal in-store disruption
- Can be used in conjunction with Back Bone free standing display units
- Platinum Award winner at FESPA 2007
